**Serii de puteri importante**:

- $\frac{1}{1-\square}=\sum_{n=0}^{\infty}\square^n$ , pentru $|\square|<1$
- $e^{\square}=\sum_{n=0}^{\infty}\frac{\square^n}{n!}$, pentru $\square\in\mathbb{R}$
- $\cos\square=\sum_{n=0}^{\infty}(-1)^n\frac{\square^{2n}}{(2n)!}$, pentru $\square\in\mathbb{R}$
- $\sin\square=\sum_{n=0}^{\infty}(-1)^n\frac{\square^{2n+1}}{(2n+1)!}$, pentru $\square\in\mathbb{R}$
- $\mathrm{ch}\square=\sum_{n=0}^{\infty}\frac{\square^{2n}}{(2n)!}$ , pentru $\square\in\mathbb{R}$
- $\mathrm{sh}\square=\sum_{n=0}^{\infty}\frac{\square^{2n+1}}{(2n+1)!}$ , pentru $\square\in\mathbb{R}$
- $(1+\square)^{\alpha}=1+\sum_{n\geq 1}\frac{\alpha(\alpha-1)(\alpha-2)\ldots(\alpha-(n-1))}{n!}\square^n$ , pentru $|\square|<1$ și $\alpha\in\mathbb{R}$
- $\ln(1+\square)=\sum_{n=1}^{\infty}(-1)^{n+1}\frac{\square^n}{n}$, pentru $|\square|<1$
- $\ln\frac{1}{1-\square}=\sum_{n=1}^{\infty}\frac{\square^n}{n}$, pentru $|\square|<1$
